EXECUTIVE SUMMARY

PMP-Certified QA & Delivery Leader with 13+ years of experience leading the planning and implementation of large-scale enterprise projects across the full SDLC. Offers mandatory expertise in Banking software implementation and enterprise SaaS platforms. Proven capability in assembling and coordinating project staff, defining scope and deliverables, and managing annual project budgets estimated at ₹1–3 Crore. Highly skilled in strategic planning, conducting stakeholder meetings, and managing resource allocations for cross-functional global teams of 19+ members. Proficient in advanced project management software (Jira/Confluence) and Agile/Scrum delivery methodologies.

CORE COMPETENCIES & SKILLS

• **Project Management:** PMP Certified | Full SDLC Implementation | Strategic Planning | Project Budget Management

• **Delivery Leadership:** Cross-Functional Team Leadership (19+ members) | Resource Allocation | Scope & Goal Definition | Project Deliverables & Sprints | Budget Process & Allocation | JIRA / Confluence Configuration | Project Documentation & Sign Off | Acceptance Testing

• **Domain Expertise:** Banking Software Implementation | FinTech | Enterprise SaaS | IT Governance | HealthCare

• **Management:** Bank Stakeholder Communication | Staff Assembly & Interviews | Performance Accountability

• **Technical/Tools:** Jira | Confluence | Project Management Software | CI/CD | Risk Management | UI Automation (Selenium, Java, TestNG, Cucumber, BDD) | API Automation (Rest Assured, Postman) | Performance Validation (JMeter) | CI/CD (Jenkins, GitHub, Docker) | Automation Architecture

PROFESSIONAL EXPERIENCE

Publicis Sapient | Senior Associate QA L2 | Feb 2024 – Present

- Lead the planning and implementation of large-scale digital transformation projects, facilitating the definition of project scope, goals, and deliverables across the full SDLC.
- Manage large team resource allocations, assembling and coordinating a cross-functional project staff of 19+ members, including conducting technical interviews and onboarding.
- Manage project budgets estimated at ₹1–3 Crore, ensuring optimal resource planning and strict alignment with commercial and internal management objectives.
- Plan and schedule comprehensive project timelines, utilizing advanced project management software (Jira/Confluence) to track milestones and mitigate delivery risks.
- Conduct regular meetings with key business stakeholders and provide transparent executive reporting to internal management and Project Directors.
- Architected advanced automation frameworks integrating Selenium, Java, and Rest Assured, ensuring robust CI/CD execution via Jenkins and Docker for enterprise software development.

UKG | Lead QA Software Engineer | Jan 2022 – Dec 2023

- Managed quality and delivery initiatives across 3 major development cycles in a full SDLC implementation role, achieving a 98% on-time project delivery rate.
- Directed API automation (Rest Assured) and performance testing (JMeter) strategies across 3 major SaaS development cycles, ensuring high scalability.

- Applied theoretical and practical aspects of project management techniques to reduce overall delivery cycle time by 30%.
- Demonstrated proven experience in people management by directing cross-functional engineering teams and driving continuous process improvements.

Fiserv | Senior Quality Engineer | Jul 2019 – Jan 2022

- Executed mandatory banking software implementations for enterprise-scale financial systems, applying strategic planning to reduce release timelines by 30%.
- Defined project tasks and resource requirements specifically tailored for highly regulated banking environments and internal financial stakeholders.
- Led BDD-driven UI and service testing initiatives utilizing Java and Cucumber for enterprise banking software systems.
- Provided consulting expertise in utilizing project management methodologies (Agile/Scrum), managing communication with internal financial customers.
- Configured project management tools to oversee timelines, effectively reducing implementation release timelines by 30%.

SOTI | Quality Engineer | Sep 2016 – Jul 2019

- Designed reusable performance validation libraries (JMeter) to execute load testing for high-scale mobility platforms supporting 10,000 concurrent users.
- Managed client expectations by transparently reporting on critical technical milestones.
- Secured final project documentation and sign-offs from key stakeholders.
- Designed performance validation libraries to improve system reliability across concurrent mobility projects.
- Led communication via MS Teams to synchronize external design documents with the central architecture group.
- Captured improvement points based on project outcomes to optimize resource allocation and team productivity.

CresTech | Quality Engineer | Sep 2013 – Sep 2016

- Assisted in developing full-scale project plans for test automation frameworks, improving software delivery efficiency by 15%.
- Built foundational test framework architectures leveraging TestNG and web technologies.
- Fostered strong internal communication within Agile testing pods.
- Optimized software delivery lifecycles by 15% through meticulous project reporting.

EDUCATION

Doctorate in Emerging Technologies – Generative AI | Pursuing

Bachelor of Computer Science | GBTU University | 2012

CERTIFICATIONS

• Project Management Professional (PMP®)
• Certified Scrum Master (CSM®)
• Lean Six Sigma Black Belt & Yellow Belt
